## Classic Flat-Roof Enclosure

Galvanized or fiberglass panels are available in 4' widths and heights of 8' and 12'.

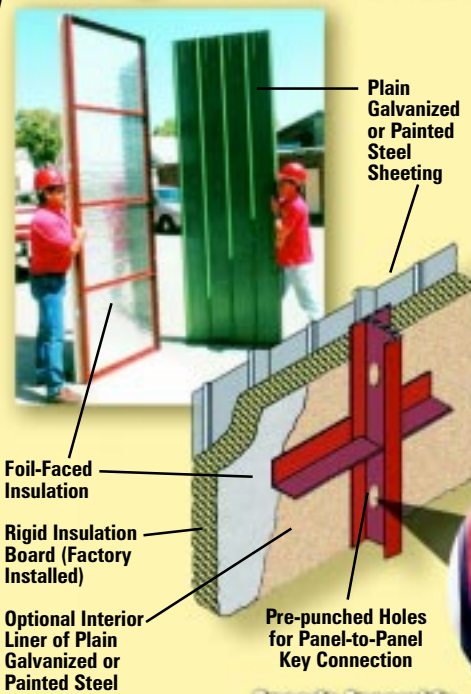

Put up in 1/2 day!

- On-site, reusable metal enclosures for a variety of plant maintenance and upgrading projects...from boiler cleaning to retrofitting new generator installation.
- Decrease downtime by having crews close to tools and break rooms.
- Easy to reconfigure structures to accommodate each job site's size and access requirements.
  - Quick delivery.
  - Easy to install.
- Mini-Span panels can be purchased with factory-installed insulation. Field testing has confirmed that these insulated enclosures can provide comfortable and acceptable sound levels for maintenance/construction activities.

## Easy to reconfigure

Speeds Assembly

# Keep crews and tools close to work areas

**Locate where needed!**

- Non-combustible metal panels eliminate fire safety concerns when working deep within the plant.
- Reduce elevator overload from traffic at break and lunch time.
- Your employees can quickly attach and interchange roof panels and wall panels when needed.
- On-Site Reusable Enclosures are a practical way to increase productivity, while reducing costs for contractors and owners.
- On your next project, reconfigure larger enclosures into smaller ones, or add additional panels to enlarge.

## Ready to assemble in minutes!

**Modular panels.**

- The included shipping system simplifies relocation and storage.

# Reusable SEE-THROUGH Expanded Metal Partitions

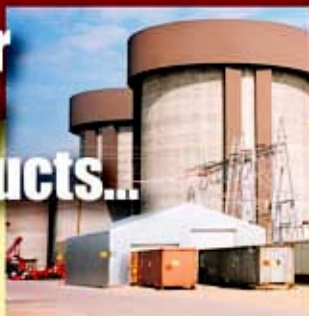

## Security cages protect equipment & tools

- Sturdy see-through metal panel partitions provide ventilation and light.
- Simple to erect, more durable than wire mesh.
- Interchangeable panels can form a roof for total security.
- Post support braces or "feet" provide tough, free-standing partitions when anchoring to the floor is not an option.

## Other Kelly Products...

**System 2 Permanent/Relocatable Industrial Steel Buildings.** Panel building system that allows flexibility to relocate.

**Mini-Span Relocatable Building System.** A narrow-span, relocatable jobsite support building. 3' modular pre-framed structured panels lock together. Ideal for quick job site storage, fab shop and lunch rooms.

**Classic Weather Protection System.** Versatile panels and keys speed installation. Enhances working conditions and eliminates weather-related downtime on construction and industrial projects. It's the only construction enclosure that can become your next relocatable/temporary building.

**Containments.** A portable, modular containment system. Stainless steel modular panels lock together to form rigid, quick-erecting, reconfigurable enclosures that are easily decontaminated.
